About Me

I am a passionate Full Stack Web Developer with hands-on experience in building web, desktop, and IoT-based applications. I specialize in Python, React JS, and modern web technologies. I enjoy crafting user-friendly, high-performance digital solutions and continuously explore AI and Machine Learning technologies.

Experience

Web Developer & Software Engineer

2022 – Present

Freelance

- Develop web, desktop, and IoT-based applications using Python, React JS, and modern frameworks.
- Build efficient systems and deliver user-friendly solutions tailored to client needs.
- Integrate AI and Machine Learning into projects for smart, data-driven features.

Projects

Grocery Management System

github.com/Dev7570/grocery-management-

- Desktop app built with Python and Tkinter for managing grocery store inventory, pricing, and transactions.
- Features include stock management, low-stock alerts, profit/margin calculations, and Excel export.

HealthConnect

github.com/Dev7570/healthconnect

- Healthcare aggregator platform to find hospitals, book doctor appointments, and compare diagnostic test prices.
- Features Google Maps integration, patient reviews, real-time availability, and a 3-step booking system.

ShieldBoot

github.com/Dev7570/shieldboot

- Bootable USB antivirus tool powered by ClamAV engine running Alpine Linux to scan and remove viruses offline.
- Supports BIOS and UEFI, works without installation, includes Python Tkinter GUI and PowerShell setup wizard.

Skills

• Python	• React JS	• Next JS
• Tailwind CSS	• Node JS	• MySQL
• IoT Development	• Machine Learning & AI	• UI/UX Design
• Web Development	• Software Engineering	• Git & GitHub
